Description of Non-Conformance (Recorded by Auditor):	During the audit of the fabrication workshop, an unapproved and superseded version of the Pre-Cutting Inspection Checklist (Rev.00 instead of active Rev.01) was observed in active use at Workstation 3, presenting a risk of non-conforming fabrication.
Root Cause Analysis (RCA) (Recorded by Auditee):	The operator retained a personal hardcopy photocopy of the obsolete form in his toolbox rather than accessing the controlled binder. The shop supervisor had not verified document disposal following the issuance of Transmittal TR-039.
